

Set Up Cisco VPN for Macintosh

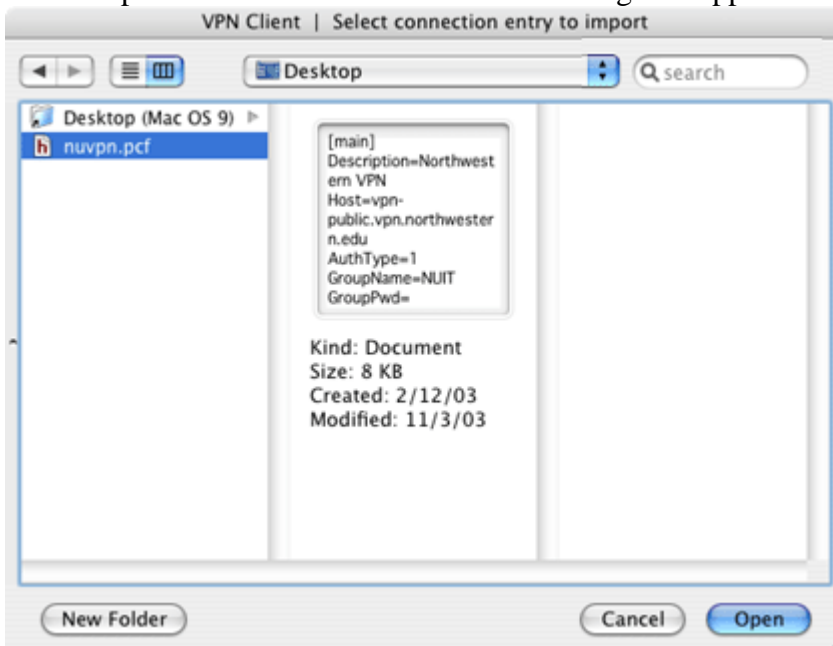

Import Configurations

The VPN client is configured automatically by the custom installer. However, if you need to import our configuration, follow these instructions:

1. **Download** the Staff_Faculty VPN Client for Macintosh OSX installer file and Profile from: <http://www.friends.edu/vpn>
2. **Launch** the VPNClient application. A window similar to the following will appear:

3. **Click Import**. A window similar to the following will appear:

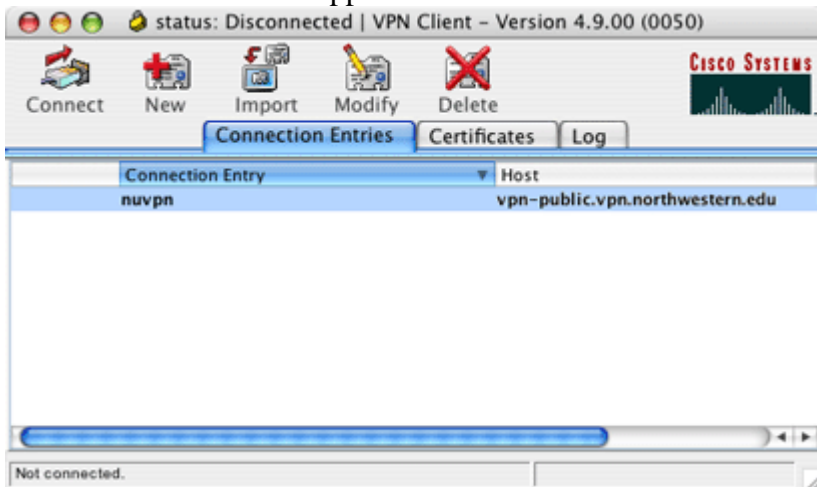

4. **Navigate** to where you downloaded the .pcf file or Profile is located.
5. **Select** the .pcf or Profile file, and then select Open. A window similar to the following will appear:

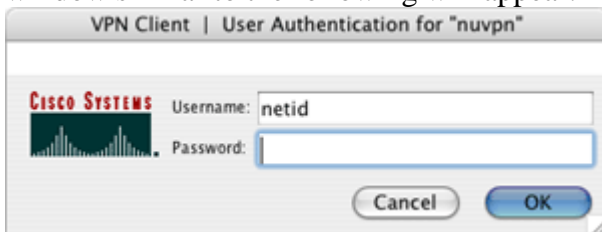

6. **Click** OK.
